25X1 FROM: [REDACTED]

SUBJ: IC Staff Study on the Interaction Between  
Producers of Scientific and Technical Intel-  
ligence and the Weapons Research and Develop-  
ment Organizations of the DOD

25X1

25X1 1. I was visited today by [REDACTED] and  
[REDACTED] of the IC Staff, who reported that  
they are getting on with phase two of a study on  
the above subject. Phase one was apparently a  
quick look at current relationships; phase two is  
to be a look at these relationships in a more  
25X1 systematic way. [REDACTED] will be doing the bulk  
of the investigating and plans to start, as he did  
last time, with OWI and Evan Hineman.

25X1 2. [REDACTED] said they were checking  
in with me to register in NFAC's front office what  
they were about. They said they had talked to  
25X1 Messrs. [REDACTED] the first time around.  
They were interested to learn if any new arrange-  
ments had been made when NFAC was established that  
pertained to their study. They stated their  
purpose as primarily an effort to impell the DOD  
into mandating a closer relationship between  
DDR&E weapons developers and DIA S&T intelligence  
analysts, with the CIA relationship amounting to a  
lesser matter.

3. I listened to their expression of inten-  
tions and posed no objection, but did promise to  
alert top management to their continuing project.
